Give your conservatory a new lease of life.

You may not realise it but simply replacing your plastic roof with a new glass roof, incorporating Pilkington **Activ™** self-cleaning glass, will have a tremendous effect on the way your conservatory looks, feels and sounds. Transforming it from a forgotten storage area into a wonderful and usable extension to your home. One that can be enjoyed all year round, come rain or shine.

When fitted with our revolutionary Pilkington **Activ™** glass and our low-emissivity Pilkington **K Glass™**, your newly transformed conservatory will be warmer in the winter, cooler in the summer and a lot less noisy when it rains. Even conservatories with old glass roofs will benefit from better thermal insulation and solar control properties. And thanks to the clever self-cleaning capabilities of the glass, you can be sure your beautiful new conservatory roof stays that way.

The benefits are crystal clear.

Switching from a plastic roof to a glass one can transform your conservatory in more ways than one. Here are the main benefits:

- Increased energy efficiency for greater comfort and lower heating bills
- Less noise when it rains for a more relaxing and peaceful environment
- Revolutionary self-cleaning glass for a more practical and attractive finish
- Available with solar control for greater comfort during summer months
- A simple and affordable way to enhance the look and value of your home

From this

Stop your heating bills going through the roof.

A plastic roof is not necessarily energy efficient. Which means you actually end up paying more for a conservatory you use a lot less. By replacing your conservatory roof with Insulating Glass Units consisting of Pilkington **Activ**™ glass and low-emissivity Pilkington **K Glass**™, you will reduce your heating bills and add a warm and welcoming space to your home.

To this

A relaxing space, whatever the weather.

Here in Britain the rain can put a dampener on many things. Relaxing at home in your conservatory doesn't have to be one of them. With a plastic roof, a light shower can sound more like a hail storm, but with a glass roof incorporating Pilkington **Activ**™, you might not even notice.

A few words from our customers.

“The original roof had never been particularly good as the seals were poor and it was impossible to clean, so we had to add blinds. We are truly delighted with the results as we now have a conservatory that we can use. It is very pleasant now to look out into our garden. We have more space and it feels like we have a new addition to the home rather than a tired room that could never be used.”

Mr James, Formby.

“Replacing my conservatory roof has transformed the look of our home. It is first class and is impressive to look at from both inside and outside. What was once a shabby room is now a pleasure to use and we are truly delighted with the results. This was the ideal option to improve our conservatory.”

Mrs Meyers, Wirral, Cheshire.

Let Pilkington help transform your conservatory, and enhance your home.
